

The Amerit Difference – Our Solutions Keep You Rolling

At Amerit, we have built our reputation on being the country's most professional, dependable, trustworthy and hard-working partner through our singular focus on doing one thing and doing it better than anyone else – Fleet Maintenance and Repair Solutions.

Every fleet has unique needs and challenges. At Amerit, we understand that customized solutions are imperative to the success of your operation. Which is why our solutions design team works with you to create customized fleet maintenance and repair solutions, specifically created with your needs, locations, schedules and vehicles, in mind.

Whether you're partnering with us to implement a single solution, like our Fleet Service Center, or you're looking to implement multiple solutions at once, like our Mobile Service Centers coupled with our On-Site Workforce, each of our solutions is executed with professionalism, reliability and dedication.

At Amerit, we're dedicated to the relentless pursuit of uptime.

On-Site Workforce

Our on-site workforce is your garage, our technicians and no hassle. Amerit's on-site workforce brings technical and managerial experts, as well as shop management practices, to your garage. We bring a world-class maintenance operation to you, so you can focus on your business.

This solution is perfect for any fleet looking to start a new location quickly, or to improve an existing location. Our dedicated team delivers turnkey workforce solutions with top-tier, qualified technicians and management, nationwide.

We hire technicians and managers to fit the needs of your fleet. Their expertise in daily operations, reporting and quality work will ensure your garage and fleet are running at top efficiency.

Amerit's on-site workforce is an incredibly flexible and responsive fleet maintenance solution. Like all our solutions, our on-site workforce is focused on your needs. We can handle anything you need, like a comprehensive solution to incorporate top-tier technicians, nationwide management, and FMS KPI data and tracking. Or, augmenting your current team with our best-in-class recruiters.

In addition to flexibility and responsiveness, this solution is a great way to eliminate stress and reduce risk. Our technicians and managers are not only dedicated to the pursuit of uptime, but also to safety and compliance. We'll focus on running your shop and keeping your fleet rolling, so you can separate yourself from the burdens of recruiting, training and managing the team. We handle the range of responsibilities it takes to run a safe garage, protecting you and your fleet. Compliance is covered with Amerit because we ease the pain of OSHA, HAZMAT and other safety risks.

While it might seem more expensive, an on-site workforce maintenance solution can save your fleet money. How? By eliminating the costly third party spend that comes with inadequate staffing and outsourcing maintenance. We focus on staffing your garage with the right number of techs, with the right skill sets, to handle all of the needs of your fleet in-house. This reduces your overall costs and downtime of vehicles.

It's your garage, and it's your data. With Amerit's on-site workforce, we handle the daily operations of the garage, but you never lose control or visibility of your data. All data is captured according to your needs, in your FMS or ours, and available for review through our KPI dashboards. This enables you to track, measure and monitor the data most important to you.

Mobile Service Center (MSC)

Simply put, our Mobile Service Center (MSC) is a garage on wheels. Each MSC is perfect for remote locations or when there isn't a maintenance facility on-site. We developed this solution to provide the highest quality maintenance and repair services on location, anytime and anywhere in the country.

Our approach to mobile maintenance is true to our core principle of providing customer-centric solutions. Each MSC is built and equipped to meet the needs of the fleet it serves, capable of handling most routine maintenance and repair services at your location, on your schedule. Designed and stocked to accommodate all the tools, parts and equipment your fleet needs, each MSC has been designed to go beyond PMs to provide the highest quality maintenance and repair services on location, anytime and anywhere across the United States.

MSCs maximize uptime by eliminating the need for expensive drive time and downtime, transporting assets to and from an off-site garage. As a virtual rolling garage, each MSC offers comprehensive services exactly where you need them.

Our MSCs are designed with your fleet in mind, so we work around your schedule. Often this means our techs work overnight and on weekends, so when you come back to work you are ready to roll.

As a garage on wheels, each MSC is equipped for real-time entry of all maintenance data. Although your service is remote, gone are data gaps, black holes and inconsistencies. Our MSCs welcome KPI dashboards, visibility and control.

In addition to being incredibly convenient, each of our MSCs meet all local, state and federal environmental and HAZMAT regulations. Amerit assures peace of mind for environmental compliance. So, it's good for you, for your fleet, for your customers and the environment.

Fleet Service Center (FSC)

Focused on rapid turnaround and comprehensive, high-quality services for a small number of fleets, our FSCs act as your home garage, minus the hassle. Rather than dealing with inconsistencies and managing multiple vendors, our FSCs are staffed with the right tools and technicians to take care of your fleet.

Each FSC is a custom-built, one stop shop. Our facilities are built to handle all your fleet maintenance and repair needs, complete with real-time data capture so you have visibility and control.

FSCs are designed to increase uptime. The time your vehicles spend waiting for service drains your profitability. Amerit's FSCs focus on you and are responsive to your needs, ensuring your fleet is in, out and back on the road as soon as possible.

Your fleet is our number one priority, and we know your vehicle belongs on the road, not parked in the lot. Every FSC is dedicated, which means it is only available to your fleet – our doors are closed to everyone else – ensuring you have rapid access to technicians.

Amerit staffs FSCs during fleets' routine downtimes, including nights and weekends. When your drivers go home, we go to work. Our goal is to increase uptime and that means working when needed. We work during your routine downtime, ensuring the fastest turnaround possible and the best quality fleet repair services.

Our FSCs offer flexibility without compromising professional, expert technicians. Our fleet maintenance and repair technicians are certified to the highest standards and continue regular training to ensure your fleet always receives the professional care it deserves. Our technicians also focus on safety, making sure all your fleet's assets are compliant and safe.

Running a fleet maintenance operation can be overwhelming. Finding the right maintenance partner can be equally daunting. At Amerit, we are more than just your maintenance provider, we are your partner. We'll work with you to develop innovative solutions that fit your fleet and maximize your uptime and profitability.

With a nationwide team of maintenance experts, we can deliver world-class fleet maintenance programs wherever and whenever you need us.

The Amerit Difference

At Amerit, we have built our reputation on being the country's most professional, dependable, trustworthy and hard-working partner through our singular focus on Fleet Maintenance and Repair Services.

Relentlessly focused on minimizing your downtime and maximizing your fleet's performance, the name Amerit has become synonymous with custom-built maintenance programs that rest on a foundation of our core principles: integrity and customer service.
